

Heavy Metals Analysis

22 APRIL 2019

THE EVERGREEN TREE

Product #	Lot #	Metals	Spec	Results
R-25-3	040319-03	Arsenic	< 10,000 ppb	136 ppb
		Cadmium	< 4,100 ppb	22 ppb
		Lead	< 900 ppb**	416 ppb**
		Mercury*	< 300 ppb	19 ppb
		Nickel***	< 1,000 ppb	3080 ppb

Product #	Lot #	Metals	Spec	Results
G-25-3	040319-03	Arsenic	< 10,000 ppb	93 ppb
		Cadmium	< 4,100 ppb	28 ppb
		Lead	< 900 ppb**	158 ppb**
		Mercury*	< 300 ppb	13 ppb
		Nickel***	< 1,000 ppb	3930 ppb

Product #	Lot #	Metals	Spec	Results
W-25-3	040319-03	Arsenic	< 10,000 ppb	159 ppb
		Cadmium	< 4,100 ppb	23 ppb
		Lead	< 900 ppb**	409 ppb**
		Mercury*	< 300 ppb	12 ppb
		Nickel***	< 1,000 ppb	2910 ppb

Sample Set: 120160

Heavy Metals Analysis

REVISION 999-1111

INFORMATIONAL RESULTS KEY

United States Pharmacopeia (USP) Limit for Nutritional Supplements:

- Arsenic 3.000 ppm / 3000.000 ppb
- Cadmium 3.000 ppm / 3000.000 ppb
- Lead 10.000 ppm / 10000.000 ppb
- Mercury 3.000 ppm / 3000.000 ppb
- Nickel 1.000 ppm / 1000 ppb***

California Proposition 65 Daily Limits for Heavy Metals:

- Arsenic 10 ppm / 10,000.000 ppb
- Cadmium 4.1 ppm / 4,100.000 ppb
- Lead 0.5 ppm / 500.000 ppb**
- Methyl Mercury 0.3 ppm / 300.000 ppb

For labels with a single daily dose of 500mg, the PPM in products cannot be higher than:

- Arsenic = 20.000 ppm / 20,000.000 ppb
- Cadmium = 8.000 ppm / 8,000.000 ppb
- Lead = 0.900 ppm / 900.000 ppb
- Mercury = 0.600 ppm / 600.000 ppb

FDA Tolerable Daily Diet Lead intake:

- Children <6 years old = 6.000 ppm / 6000.000 ppb
- Pregnant women = 25.000 ppm / 25000.000 ppb
- Adults = 75.000 ppm / 75000.000 ppb

* Methyl mercury is included in total Mercury. Method AOAC 993.14 is equivalent to method ICP-MS USP <730>.

** California's Proposition 65 set up overly restrictive limits for many materials in relation to lead. There are many plants that have higher levels of lead than is acceptable in the State of California. One example is *Mitragyna speciosa*, which naturally has lead levels above 500 ppb.

This restriction will technically cause a FAIL for any material above 500 ppb in the State of California, which is why we have separated out that state from all the others in the USA.

If your CA result comes back as a "HI-LEAD", you may be required to place notices on your material, or it may be a

*** According to the USP, the safe Tolerable Upper Intake Level of Nickel for adults is 1.0mg/day, rounded down. This equates to 1,000 ppb for any consumable material.
